

Stillsmiths TASMANIA

The Distillation of Quality

COMMITMENT TO QUALITY

OUR VISION

To become the premier Distillation equipment supplier in the southern hemisphere, setting the standard for quality, innovation and service

OUR MISSION

Delivering all projects to the highest quality standards.

Maintain the utmost safety in all aspects of work.

Exceed client's expectations through superior craftsmanship and engineering.

Foster strong, professional relationships with clients

Overview

Stillsmiths Tasmania, backed by Kolmark Pty Ltd's two decades of industry expertise, provides fully integrated distillery solutions, from initial design to final commissioning. Our approach goes far beyond equipment fabrication—we specialize in creating safe, compliant, and efficient distillery environments tailored to each client's unique needs. Our extensive background across food, beverage, and pharmaceutical sectors ensures that every project meets rigorous standards in quality, safety, and operational compliance.

Key Capabilities

- **Turnkey Distillery Design & Engineering:** Offering full-scale, custom-designed distillery setups, we manage each phase meticulously to meet safety and compliance standards while maximizing operational efficiency and performance.
- **Safety & Compliance Leadership:** Safety is foundational in every project. We incorporate comprehensive Hazard and Operability Studies (HAZOP), Hazardous Area Certifications, and detailed process reviews to ensure complete regulatory compliance and operational security. Our team is committed to following best practices that prioritize the safety of both personnel and equipment.
- **Custom Copper Stills & Equipment:** Each still and distillery component is crafted for precise performance and long-lasting durability, tailored to meet both client specifications and regulatory standards.
- **Large-Scale Manufacturing:** Our 1,500-square-meter facility, staffed by over 30 skilled professionals, is equipped to handle complex, high-stakes projects with ease. We manage up to \$25 million in concurrent work, ensuring each project benefits from our commitment to quality and safety.

Major Projects

- **Southern Wild Distillery (Tasmania):** 1,100L gin still – design, fabrication, installation, and commissioning.
- **Reefton Distillery (NZ):** 1,800L whisky still – design and fabrication.
- **Forty Spotted Gin (Tasmania):** 900L gin still – design and fabrication.
- **Callington Mill Distillery (Tasmania):** Distillery capacity of 450,000L annually – design and installation.
- **Lark Distillery (Tasmania):** design, fabricate, install and commission 400mm dia. Column Still
- **Western Tiers Distillery (Tasmania):** Distillery capacity of 80,000L annually – design and installation.
- **Alchemy Asia (Vietnam):** design and fabricate 900L Gin Still
- **Adam's Distillery (Tasmania):** Distillery capacity of 1,000,000L annually – design and installation.
- And many more successful projects across Australia, New Zealand, and beyond.

Commitment to Safety, Compliance, and Quality

At Stillsmiths Tasmania, safety and compliance drive every project. From advanced hazard assessments to process reviews, our dedication to safety ensures every distillery is built to the highest standards, protecting both people and property. Quality and precision are embedded in every material and method we employ, delivering excellence from concept through to completion.

We welcome the opportunity to discuss your next distillery project, where safety, quality, and compliance come standard.
